

# FLAGSTAND

FlagStand is delivered in a nylon bag for easy transportation. And a ground stake is available as an option to the weighted base.

The weighted base offers stability and easily folds for transportation. For added stability, there is an extra weight available for placement in the middle of the weighted base (recommended for tallest flag). Optional stakes are also available for soft surfaces like snow and grass.

FlagStand is a lightweight, portable flag stand that is perfect for all outdoor events, marketing activities and campaigns. It is very stable even in strong winds and can be used in most weather conditions. This free-standing flag stand is available with a weighted base or with a ground stake and can be used on most surfaces such as snow, asphalt and grass.

The materials of the FlagStand have been carefully selected to handle long term outdoor use. Your logo, image or text will have exceptional visibility and the display is designed to swivel with the direction of the wind. An optional weight is available for added stability and should always be used for the tallest FlagStand. The product comes in an easy to carry nylon bag and it only takes a minute to set up without a ladder or tools.
