

POLE SYSTEM

The Pole System is a one-piece system, with feet that collapse at the press of a button.

Pole System allows you to raise your message to the ideal height for your needs. This is especially practical when you want to display products under the message. The Pole System is suited for graphic panels of varying lengths and widths. You can also adjust the height of the system to fit the place and occasion – even with a mounted panel.

Pole System can be used single-sided or double-sided. Panels attach very easily to the pole and the system is lightweight, but very stable, thanks to the integrated feet.

INCLUDED

Pole System stand with integrated feet, graphic, telescopic pole, a protective bag for graphic and nylon carrying bag
