

# SOFT IMAGE COUNTER

The system locker makes assembly easy.

Side attachments for extending the image across the sides are standard on all frames.

The Soft Image Counter comes as simple as can be. The system really only comprises four parts - an aluminum frame, a fabric image, a counter top, and an internal shelf. Open it up and in less than a minute you have a powerful message and a functional counter top!

Soft Image Counter takes up very little space when folded and also weighs very little, making it easy to handle and transport. The fabric graphic is attached using Velcro and remains attached when the display is collapsed, which makes set up a snap! When the graphic message needs to change, the Velcro allows for easy replacement.
